Game Title:

Car Driver

Game Description:

Drive your car carefully on a busy road. Avoid collisions with other vehicles! Use the **arrow keys** to move **left** or **right**. If you crash, you lose and the game restarts.

Gameplay:

Controls: Arrow keys (Left/Right)

Objective: Travel the longest distance possible without crashing.

Penalty: Colliding with other cars results in losing and restarting the game.

Target Audience:

All ages, especially players who enjoy racing and reflex-challenging games.

Genre of the Game:

Arcade Driving Game – The game involves controlling a car on a busy road, avoiding collisions with other vehicles, and trying to achieve the highest possible score.

Motivations for Playing:

Improve reaction speed.

Challenge to beat personal high scores.

Team Roles & Task Distribution:

Team Leader & Lead Developer

Name: Abdellmieed Abdu Akkur

University ID: 44150677

Responsibilities:

Team leadership and task coordination

Main game coding using JavaScript

Game loop and scene management

Physics implementation (movement & collision detection)

Input handling (keyboard controls)

Integrating all game components

Final testing and debugging

Game Designer

Name: Ghazi Aedh Alosaimi

University ID: 44106143

Responsibilities:

Game concept and idea development

Level and gameplay design

Difficulty progression planning

Visual layout planning

Assisting in testing gameplay balance

Graphics & Assets Designer

Name: Turki Majed Alosaimi

University ID: 44150561

Responsibilities:

Designing player and obstacle sprites

Background image selection/design
Visual consistency of game elements
Asset optimization for web performance

Documentation & Research

Name: Saham Nasir Alotaibi

University ID: 44150806

Responsibilities:

Writing the game documentation
Game description and genre explanation
Target audience and motivations section
Formatting the final documentation for submission

Testing & Quality Assurance

Name: Mohammed Hassan Alotaibi

University ID: 44203336

Responsibilities:

Testing gameplay functionality
Identifying bugs and issues
Reporting performance and collision errors
Assisting in gameplay improvements

Presentation & Deployment

Name: Multaz Dhawi Almugati

University ID: 44251937

Responsibilities:

Preparing final project submission
Organizing project files
Ensuring the game runs correctly on different browsers
Assisting with presentation and demo setup
